

Safety Consultant

Complete Health, Environmental & Safety Services, Inc. (CHESS) is a growing and respected women owned safety and health consulting firm who works primarily for small to mid-sized companies. CHESS safety experts provide winning strategies by assisting companies with workplace safety, health, and environmental issues. As an organization, we strive for excellence, think every client is important, and we think people matter. We offer a flexible, stable and collaborative work environment and offer a generous benefit package (health insurance, 401(k), PTO, educational benefits, monthly meal benefits, growth opportunities) and continuous learning opportunities.

We are currently seeking a Safety Consultant to provide direct support to multiple clients. Minimal travel outside the Twin Cities metro area will be required; full-time opportunity but we will consider part-time for the right candidate.

Key responsibilities will include the following:

- Develop safety and health programs;
- Conduct OSHA and EPA compliance audits;
- Provide safety training;
- Facilitate, participate in and help clients with their safety committees;
- Help clients with environmental compliance.

Essential qualifications for this position will include:

- Bachelor's or master degree in safety or related field (such as chemistry) preferred.
- Three to five years prior experience in safety (training, developing programs, implementing programs, conducting audits) preferred.
- Familiarity with OSHA and OSHA regulations as well as fire code and environmental regulations (hazardous waste and air quality, in particular).
- Excellent verbal and written communication and the ability to manage multiple projects at one time.
- Microsoft Office Suite utilizing Word, Excel and PowerPoint
- Valid driver's license, reliable vehicle

Additional skills and experience in the following specific areas are preferred:

- Conducting forklift operation training and evaluations
- Delivering fire safety/fire extinguisher training

- Lockout/tagout program development
- Providing electrical safety training
- Knowledge of the electrical code
- Evaluation and development of machine guarding
- Developing safety committee agendas and minutes, facilitating effective meetings
- Understanding of chemical and physical hazards (Right to Know training)

ANSI-accredited certification (CSP, CIH) is a plus, and CHES will support the effort for qualified candidates who are interested in pursuing proper certification

Qualified candidates should submit their resume and salary expectations via email to **hiring@chess-safety.com**

CHES is an Equal Opportunity Employer
